## PROGRAM DESCRIPTION

The Master of Arts in Health Policy Studies is a program that promotes the common good by ensuring that the health delivery systems address the concerns of the poor and the marginalized. There are two approaches or tracks to fulfill the requirements of this degree program, one of which is the Health Science Track. This track makes use of the different fields of public health as basis for health policy development. The various fields in public health include biostatistics, epidemiology, health care organization, health economics, health research, and health service administration.

## PROGRAM OBJECTIVE

- Demonstrate a pro-active, social, and culturally relevant analysis of priority health policy issues;
- Utilizes an interdisciplinary approach to developing ethical, relevant and responsive health policy analysis and research towards identified policy-related problems and issues that ultimately, contribute to nation-building;
- Integrates the various principles from diverse fields such as public health, economics, political science, management, operations research and organizational development to analyze health policy problems and solutions;
- Demonstrate a well-rounded practical approach to teaching health policy development at the organization and public policy levels;
- Communicates effectively with various individuals and groups for policy advocacy;
- Creates an inclusive, participative, and meaningful engagement towards consensus building in health policy development in leadership capacity; and
- Engage in lifelong learning.
