## PROGRAM DESCRIPTION

The Master of Science in Clinical Medicine (Medical Oncology) is a first of its kind in the Philippines. It provides opportunities to acquire knowledge to become not only a clinical specialist but also an educator, a research expert and a community, hospital, program or project health director. This graduate degree course creates a learning environment intended to develop medical internists into medical oncology specialists as well as health managers with broader knowledge and extensive skills with the thrust for continuous improvement.

## PROGRAM OBJECTIVES

Graduates of this program are expected to be able to demonstrate in-depth knowledge, adequate skills, proper attitude and values in:

1. Diagnosis, medical treatment, prevention and control of neoplastic diseases;
2. Research in cancer medicine, prevention, and cancer control program; and
3. Implementation of quality management and organization development/planning to achieve total quality care of cancer patients in the tertiary and community settings.
