COLLEGE OF **PUBLIC HEALTH**

MASTER OF SCIENCE IN PUBLIC HEALTH (ENVIRONMENTAL HEALTH)

PROGRAM DESCRIPTION

The Department of Environmental Health together with the other departments of the College of Public Health, students are able to obtain a better understanding of the complex relationship between man, his environment and the necessary measures for the prevention of disease and the promotion of health. The Department of Environmental Health aims to provide graduate and undegraduate instruction in the environmental health sciences and in the study, evaluation and control of environmental health problems. These are research opportunities for those who wish to work in the broad field of environmental health. Through specific research, the Department contributes to knowledge, thereby enhancing the understanding of the environmental hazards affecting human health.

PROGRAM OBJECTIVE

A graduate from the program should be equipped with the necessary knowledge and skills to:

- Recognize the different environmental hazards and their environmental and health effects;
- Apply principles and methods of controlling environmental hazards health effects:
- Plan and conduct environmental and health impact of development projects; and
- Formulate an environmental health program.
